

ALL METALS POWDER COATING

"The Powder Coating Specialists"

- fully conveyerised powder coating system
- hot phosphate pre-wash
- large batch plant facility
- all metals
- all colours
- superior finish

"The Powder Coating Specialists"

About All Metals Powder Coating:

AMPC are the Powder Coating Specialists. Our experienced tradesmen are capable of coating a variety of products made from aluminium, brass, copper, steel, galvanised steel and stainless steel in a wide variety of colours, textures and gloss levels.

Our modern, **conveyorised powder coating** plant with online four stage iron phosphate pre-treatment process and cure oven services the whole of Australia. We can powder coat products up to 770mm wide, 1600mm high and 2700mm long. Our plant is ideal for both short and long runs. In addition, we have a **batch plant** with capacity up to 1700mm wide, 2700mm high and 3200mm long.

Our experience includes industries such as:

- Automotive
- Air Conditioning
- Computers
- Defence
- Electronics
- Communications
- Filtration
- Furniture
- Gaming
- Hydroponics
- Fire Protection
- Lighting
- Medical Equipment
- Mining Equipment
- Security
- Telecommunications
- Materials Handling
- Scientific Equipment

What is Powder Coating?

Powder coating is a method of metal finishing. The process involves spraying an electrically charged powdered plastic resin on to the surface to be coated. The charged powder resin adheres to the electrically grounded surface and the product is then heated in a curing oven at more than 200 degrees C. The result is a smooth, uniform and durable coating.

Unlike liquid paints, powder coating does not contain harmful solvents, and is therefore one of the most environmentally friendly methods of finishing metal products.
